|  | By the end of Year 6 students recognise the properties of prime, composite, square and triangular numbers. They describe the use of integers in everyday contexts. Students solve problems involving the all four operations with whole numbers. | Identify and describe properties of prime, composite, square and triangular numbers |  |  |  |  |
|  |  | Select and apply efficient mental and written strategies and appropriate digital technologies to solve problems involving all four operations with whole numbers |  |  |  |  |
|  |  | Investigate everyday situations that use positive and negative whole numbers and zero. Locate and represent these numbers on a number line. |  |  |  |  |
|  | By the end of Year 6 students connect fractions, decimals and percentages as representations of the same number. <br> They solve problems involving the addition and elated fractio Students make connections between the powers of 10 and the multiplication \& division of decimals | Compare fractions with related denominators and locate and represent them on a number line |  |  |  |  |
|  |  | Solve problems involving addition and subtraction of fractions with the same and related denominators |  |  |  |  |
|  |  | Find a simple fraction of a quantity where the result is a whole number, with or without digital technologies |  |  |  |  |
|  |  | Add and subtract decimals, with and without digital technologies, and use estimation and rounding to check the reasonableness of answers |  |  |  |  |
|  | Students locate <br> fractions and <br> integers on a number line. They calculate a simple <br> fraction of a quantity. They add, subtract and multiply decimals and divide decimals where the result is rational. | Multiply decimals whole numbers and perform divisions that result in terminating decimals, with and without technologies |  |  |  |  |
|  |  | Multiply and divide decimals by powers of 10 |  |  |  |  |
|  |  | Make connections between equivalent fractions, decimals and percentages |  |  |  |  |
|  | By the end of Year 6 students calculate common percentage discounts on sale items. | Investigate and calculate percentage discounts of $10 \%$, $25 \%$ \& $50 \%$ on sale items, with and without digital technologies |  |  |  |  |
|  | By the end of Year 6 students describe rules used in sequences involving whole numbers, fractions and decimals. <br> Students write correct number sentences using brackets and order of operations. | Continue and create sequences involving whole numbers, fractions and decimals. Describe the rule used to create the sequence. |  |  |  |  |
|  |  | Explore the use of brackets and order of operations to write number sentences |  |  |  |  |

## Statistics \& Probability

|  | Achievement Standard | Content Descriptor - the student will... | Term 1 | Term 2 | Term 3 | Term 4 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| ㅇ픙등 | By the end of Year 6 students compare observed and expected frequencies. <br> Students list and communicate probabilities using simple fractions, decimals and percentages. | Describe probabilities using fractions, decimals and percentages |  |  |  |  |
|  |  | Conduct chance experiments with both small and large numbers of trials using appropriate digital technologies |  |  |  |  |
|  |  | Compare observed frequencies across experiments with expected frequencies |  |  |  |  |
|  | By the end of Year 6 students interpret and compare a variety of data displays including those displays for two categorical variables. They evaluate secondary data displayed in the media. | Interpret and compare a range of data displays, including side-by-side column graphs for two categorical variables |  |  |  |  |
|  |  | Interpret secondary data presented in digital media and elsewhere |  |  |  |  |

Measurement \& Geometry

|  |  | Achievement Standard | Content Descriptor - the student will... | Term 1 | Term 2 | Term 3 | Term 4 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Length, Area, Mass \& Capacity | By the end of Year 6 students connect decimal representations to the metric system and choose appropriate units of measurement to perform a calculation. They make connections between capacity and volume. They solve problems involving length and area. | Connect decimal representations to the metric system |  |  |  |  |
|  |  |  | Solve problems involving the comparison of lengths and areas using appropriate units |  |  |  |  |
|  |  |  | Convert between common metric units of length, mass and capacity |  |  |  |  |
|  |  |  | Connect volume and capacity and their units of measurement |  |  |  |  |
|  | $\stackrel{\circlearrowright}{\Xi}$ | By the end of Year 6 students interpret timetables. | Interpret and use timetables |  |  |  |  |
|  |  | By the end of Year 6 students construct simple prisms and pyramids. | Construct simple prisms and pyramids |  |  |  |  |
|  | 응 | By the end of Year 6 students describe combinations of | Investigate combinations of translations, reflections and rotations, with and without digital technologies |  |  |  |  |
|  |  | Students locate an ordered pair in any one of the four quadrants on the Cartesian plane. | Introduce the Cartesian coordinates system using all four quadrants |  |  |  |  |
| $\left\|\begin{array}{cc} 0 & 00 \\ 0 & 0 \\ 0 & \frac{1}{c} \\ 0 & 0 \\ \vdots & 0 \\ 0 & 0 \\ 0 & 0 \\ 心 & 0 \end{array}\right\|$ | $\frac{\frac{y}{w 0}}{\frac{0}{c}}$ | By the end of Year 6 students solve problems using the properties of angles. | Investigate, with and without digital technologies, angles on a straight line, angles at a point and vertically opposite angles. Use results to find unknown angles. |  |  |  |  |
